Stress Engineering Services provides complete Coke Drum engineering support from life assessment and extension to the design of new drums. We draw on our extensive design, testing, analysis, measuring, and monitoring capabilities, along with our vast industry experience, to solve problems that improve plant integrity, safety, and profitability. reliability and profitability.

In the Chemical & Refinery industry, facilities continue to operate at near or beyond their original design life. As a result, the industry has begun focusing on the crucial issues of fitness for service, risk, and remaining life analysis.

At Stress Engineering we understand these concerns. Our commitment and experience stems from more than 30 years of service to the industry. We specialize in providing results-oriented, engineered solutions to complex problems. Utilizing advanced technologies, innovative applications, and classical engineering methods, our team of expert engineers and technicians is able to assist our clients in improving safety, reliability and profitability.
