COKER VALVE REPAIR

VELAN Authorized Coker Valve repair and modification.

United Valve is an authorized *Velan* Coker valve service facility. We are experienced in the repair and modification of all sizes of Coker valves, both isolation and switch. The largest valves can be easily handled with our 15-ton overhead cranes, while in-house heat treat furnaces allow us to perform accurate and timely stress relief operations on Cr/Mo Coker Valve bodies. Custom-designed lapping equipment also enables us to provide quick turn-around on large valve repair orders.
